-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 16 May 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: On page 4 at line 29 "of" should be deleted.

Appropriate correction is required.

### ***Claim Objections***

Claims 4 and 5 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can only depend on multiple claims in the alternative. See MPEP § 608.01(n).

Claim 1 is objected to because of the following informalities: In step (iii) agglomerate is misspelled. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear from the specification as to what "partially dissolved" specifically includes and excludes.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al., EP 0 052 919 A2. In example 22, Chen discloses a method of preparing a food additive comprising mixing crystalline carrier particles with an additive compound; applying to the thus produced mixture a sugar solution solid under conditions such that the carrier particles are partially dissolved; and allowing the mixture to cocrystallize and agglomerate so as to form particles of increased average size as compared to the said carrier particles. This example uses dry milk and one of ordinary skill in the art would have known that dry milk contains both non-toxic soluble salts, such as sodium chloride, and additives.

Claims 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Battist et al., U.S. Patent 5,518,551.

In regard to claim 6, Battist discloses a particulate food additive comprising a non-toxic soluble salt (sodium chloride, column 10, lines 60-65), a food additive (column 9, lines 5-8), and a sugar (column 9, lines 9-11), which have been subjected to co-crystallization (column 9, lines 1-4).

In regard to claims 7 and 8, Battist discloses a foodstuff made by mixing the foodstuff with the particulate food additive (column 14, lines 12-62).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McCoy et al, U.S. Patent 4,379,177, teaches that sodium chloride is a preferred cocrystallizer material.
